

Mobile Device Donation and Electronics Recycling

Do you have any old mobile phones, tablets or laptops gathering dust at home? Consider recycling them at your AECOM location. You'll be clearing out clutter while supporting organizations doing good work in the communities where we work and live:

- If you are in a U.S. location that is recycling through Sprint, they will donate \$1 or the value of the electronic device to [ACE Mentor Program of America](#), a non-profit organization supported by AECOM that helps mentor high school students and inspire them to pursue careers in design and construction.
- If you are in any global location that is recycling through Samsung/AnythingIT, they will make a donation (based on the value of the mobile device) on AECOM's behalf to [Technovation](#), a global technology entrepreneurship program for girls.
- If your location is recycling through another vendor partner, they may make a donation to a different organization.

Donation/recycling programs will be available in many AECOM locations around the world. Watch for local notifications about the timing and which vendor your location is partnering with. If you have questions or if you would like to get a donation/recycling program started at your AECOM location, please contact your local Well-Being Partner or email globalwellbeing@aecom.com.
