

CLIMATE CHANGE

In 2019, the World Health Organization (WHO) designated air pollution and climate change as the number one threat to global health. The stats on climate change are staggering.

416 PARTS PER MILLION

The concentration of carbon dioxide in our atmosphere, as of May 2020, is the highest it has been in human history.

IT'S GETTING HOTTER

Deforestation accounts for **11%** of all global greenhouse gas emissions.

2019 was the second warmest year in history since recordkeeping began in 1880. The 5-year period between 2015 and 2019 has been the warmest in the last 140 years.

GLOBAL SEA LEVELS ARE RISING

Since 1900, global sea levels have risen 7 to 8 inches, posing significant danger to sea life, coastal cities and small island habitat.

68% DECLINE

in the global wildlife population since 1970.

350 MILLION

people around the world depend on forests for their livelihoods.

IT'S TIME TO ACT

Learn how you can protect our planet by going green, educating yourself and advocating for change in your community.
